

The Dimensional Anomaly Organization - Public Data

Origins:

The Dimensional Anomaly Organization or The Organization for short, was born when the brightest minds and the deepest pockets came together. In order to prevent, study and eradicate the anomalies that were affecting the world at the time. Countless resources were put into the project, it was the first time that nations came together in order to stop as threat that could eradicate humanity. They worked together at least for the time being. Multiple secret projects were conducting at a time in different places of the world in order to find a way that could help humanity to stop the anomalies. Until today most of the projects remain a secret from the public and most of the things around are conspiracy theories.

Regardless all the resources and money spend on the project. The solution didn't came fast enough. While they were working on a solution hundreds were being dying by the manifestations of the anomalies. The anomalies affected everything, food, technology, economy, nothing was saved and it was just a matter of time before humanity were eradicated a the world as we know it transformed into something new, that will be home to a foreign life. In desperations government authorized the use of nuclear weapons to contain some of the most deadly anomalies. The efforts were in vain it only slowed down as weapons and technology of the time weren't effective against the threat.

Humanity endure the unknown manifestations for years, using the best technology including AI was not enough. Until it finally happened, humanity resilience finally paid off. Rumor has it The Organization was able to capture a non aggressive anomaly and through it they were able to study and understand it's composition. The details of the experiment remain a secret, but soon after they found a way to stop some of the anomalies and humanity had a change to fight back once again. This was not without risk as they didn't know how the technology would affect humanity in the long run, but they couldn't sit and wait.

Agents:

Weapons are effective as long someone can handle them and that's why agents became into existence. The first produced weapons were effective against the anomalies, but they couldn't be used by normal humans beings for a long period of time. As the energy they produced were harmful to humans. As so the Agents were born, a new breed of human soldiers designed to protect humanity against the anomalies. To become an agent humans must go through a series of steps, not only psychically but also mentally. This new breed of humans are not only able to tap into our reality but also use the manifestation of different ones. They always use distinctive mask and cloth that cover most of their body. The purpose on the attire serve two purpose, to protect the agents from different manifestations, but also to protect normal humans/civilian from the energy the emanate from their bodies. For normal humans, it's like being exposed to radiation without any protection. The process of how a normal human become and Agent still classified to this day.

Social Impact of The Organization:

At first The Organization were considered saviors of humanity. To the point of almost reverence like a new religion. After all they were able to make the biggest discovery in human history, that will help humanity from extinction. They soon raise to a global status in a short time, like no other entity ever had. They do not only work hand in hand with governments around the world, they became an essential part of the new system.

Not everyone agreed with how much power The Organization had and after they were able to control the most deadly anomalies. Some governments start to question how much involvement they had on everything around the world. But the manifestation of the anomalies didn't disappear they keep appearing all over the world in new shapes and forms. Making The Organization an essential part of the world. As they didn't share their knowledge and technology with other organizations outside their own. The world was forced to now adopt these new system on which The Dimensional Anomaly Organization were the apex predator of the system and some people didn't like that.
